DONES TO INTRASTRUCTES

BIG PAYMENT ON THE BUCKHORN

Purchasing Syndicate Shells Out factory and stock closes strong at is \$20,000 and Leaves for Home.

LANYON COMPANY'S OBJECT

NEW LIFE IN THE CARBONATE HILL DISTRICT.

Sixty days ago James A. Butchart, for himself and eastern associates, closed a deal with W. F. Snyder of the Western Exploration company and the Neidringhauses of St. Louis, for the famous Buckhorn mines of Opnir. A substantial payment was made to bind the bargain and Mr. Butchart took his departure. He was taken sick while in Salt Lake and has ever since been unable to attend to business in per-

Yesterday a heavy payment, under-stood to be \$20,000, on the purchase price became due and Mr. Snyder, who was seen during the afternoon, stated that representatives of Mr. Butchar, who have been on the ground for the past two or three days, had promptly

past two or three days, had promptly met the requirements of the contract entered into by plunking down the coin. They then took the trail and pulled out for the east again.

"So far," said Mr. Snyder, "the purchasing crowd has shown every disposition to do business and do it right, I have not the slightest doubt that the sale will be closed according to the terms agreed upon in the beginning, and I am just as certain that the mine and I am just as certain that the mine will brove to them that they secured one of the best bargains that Utah has one of the best bargains that Coan has offered in a long time. In the Buck-horn they are securing a property that is already a mine, and one which, when developed to the depth of which it is developed to the depth of which it is capable by tunneling alone, will prove the peer of many of the bonanzas of the state with world-wide reputations

"The purchasing syndicate is now planning to inaugurate a campaign of much broader scope than has ever been employed at the property, and the winwill, therefore, be a lively one in the famous old camp.'

MINES EAST OF OGDEN.

Carbonate Hill Operations Awaken New Interest in the District.

So much interest is developing in the mining district of which the properties of the Carbonate Hill company is the radiating center that it now appears as canyon, south of east of Ogden. Matt. A. Dougherty, superintendent of the Carbonate Hill mines, came in from camp again yesterday morning to dispose of another carload of ore. The consignment this time consists of fortyone and one-half tons and, if the re-turns are as satisfactory as were they on the car shipped earlier in the month, he expects to land a car in the marke every few days from now on. At the mine development is steadily progress ing, and the showing being made is a and more than he expected it could be for the amount of work done. He con siders that there is no longer any doubt as to the permanency and worth of the mines made there during the next fev

results attained by the Carbon ate Hill have stimulated several of its neighbors to the point that work is be-ing resumed, while in an instance or two, at least, it has resulted in new blood being brought into the camp. Daniel Heimer, of Morgan, has just awarded a contract for 150 feet of tunneling on his Mountain Sheep property, adjoining the Carbonate Hill on

Herbert Pembroke has a force of men at work on his Morgan-Argentine group and the Bybee brothers, Mr. Dougherty understands, have just giv-en a bond and lease on their claims. above the Carbonate Gem, to Salt Lake parties whose identity he was unable to learn previous to leaving the mine. The Carbonate Gen mines, the property of the New York & Western Fxploration company, and managed by A. A. Van Patten, of Ogden, are understood to be in a fair way of changing hands. Eastern and Ogden men, Mr. Dougherty states, are reported to be after the property, which is one of ex-

ceptional merit.

For some time past men have been scouring the hills in the vicinity of the properties that have developed veins in the past and the possibilities of making new discoveries, Mr. Dougherty considers, are just as bright as they are in any of the better known dis-

MERGER OF LEAD COMPANIES.

Closing of Pending Deal Will Give American Company a Cinch.

The deal for a combination of the National Lead and the United Lead company is not off. Equitable terms cannot, it seems, be agreed upon, says

The American Smelting & Refining interests are behind the United com-pany, while the Standard Oil people are behind the National Lead company, and this is not the first time that these two interests have crossed swords, in previous instances, concessions will probably be made by each side, and the deal finally closed. The lead business of the United States will then be firmly intrenched in the hands of the American Smelting & Refining company.

MINING STOCK EXCHANGE.

Month Closes With the Market in

Shape to Respond to Cool Weather The week and month on the mining exchange closed yesterday with business moderately active and with prices of the participating stocks generally firm. During the month a total of 440,143 shares of stock, with a selling value of \$119,717.08, changed hands. The week's trading showed a slight improvement over the week previous, with transfers of 108,916 shares of stock that soid for \$30,031.05, while the closing session brought out 6,400 shares of a selling value of \$2.275.57.

Storms of the past two or three days Storms of the past two or three days have brought on real fall weather and the talent is expecting that with it will come an improvement in business. Reports from all the mining camps, and particularly from those of Tintic and Bingham, have been of a most encouraging nature all through the month and, if the market responds as it ought to, there should be lively times on 'change between now and the end of the year.

change between now and the end of the year.

The misfortunes of the Ontario company have had a rather depressing effect on stocks of the mining companies operating in that district, but every day now brings the reopening of the long-drain tunnel that much nearer the end and, unless unsuspected obstacles intervene, the unwatering and resumntion of operations at that property, and the Daly as well, will have been inaurunated during the part sixty days. That accomplished, the old camp will boom again, for the mines, both old and new, were never in better shape to produce ore and make money than they are today.

BUYING IDAHO MINES.

United States Company Bonds Parker Mountain Property.

A mining deal that means a great deal to the future of the Parker Mountain district was transacted in Challis the fore part of last week, when the United States Mining & Smelting com-pany, through its agent, C. G. Goss, bonded the remaining one-half interest of the Parker claim from the Williams Reviewing the San Francisco market for Tonopah, Goldfield and Bullfrog stocks during the week, the correspondent of James A. Pollock & Co., wires as follows:

'The week closed with the market at its weakest stage. This market very narrow and very often small selling or buying orders visibly change it. The market is also subject to slightest rumors. Montana's weakness is due to rumors of skipping the next quarterly dividend. Senator Nixon assures me twill be paid, but the following quar-

his mining section.

The company with only a half interest in one claim in the camp did not care to go ahead, but now it has a bond on the entire claim, and has bond-ed a number of other adjoining claims from the Messrs. Kerr, Williams and Hunt, it looks as though something would be done at Parker Mountain. shipping ore regularly.

"Midway has a treasury of \$100,600 and a dividend will be paid early next year. North Star looks bottom. West End is shipping good ore and the stock End is shipping good ore and the stock train left Challis last week loaded with supplied for the company, and a force of men went out to put up buildings

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., me of their Boston correspondents, the record of sales of Utah stocks on the Boston market, with range and closing quotations:

ductations:

Boston, Sept. 29.—The boom is still on, Tecumseh rose to 15 on heavy buying by the pool. Rhode Island was active around 7%, but it is still a big speculation, and we advise selling some at this level. Osceola is being allowed to go up on its immense earnings and ought to sell 20 points higher. Lawson brokers are steady sellers of Range. Franklin looks high enough, but Atlantic ought to be good for over 29. Quincy, Tamarack and Calumet & Hecla are making a good showing, and when money becomes easy will sell higher. Quotations:

ORE AND BULLION.

Settlements in the Open Market for Sept. Show Sharp Falling Off.

Ore and bullion settlements in the of September, as reported by McCornick & Co., amounted to \$1,955,300, a falling off, as compared with the reported settlements for August, of more than \$500,000. This discrepancy is not believed to be due to any decrease in the amount of ore marketed, but rather to the policy of the smelting concerns not reporting the full amount of

business done.

The week's settlements, as reported, amounted to \$454,200, yesterday's proportion of the total being \$68,200, as follows: Silver, lead, gold and copper ores, \$35,500; base bullion, \$32,700.

BECK TUNNEL BUYS GROUND.

Tintic Company Adds Large Acreage to Its Holdings.

Provo, Sept. 30.—Peter M. Peterson and Louisa Peterson of Salubria, Ida., have conveyed by warranty deed to the Beck Tunnel Consolidated Mining company, 124.22 acres of land in township 10 south, range 2 east. Salt Lake meridian, except the following mining claims, millsites, etc., included within the boundary lines of the land conveyed The Pythagoras and the Smug-ler mining claims, the Ryan, the Pax-man and the Paxman No. 2 millsite and the right of way of the Tintic range railway company. The consideration named in the deed is \$1,500. Dr. C. B. Snyder, representing the to manufacture gas from the broken anthracite coal deposits in the mountains east of Provo is advertising for The Lanyon company, Mr. Quimby

LANYON COMPANY'S PURPOSES.

Going Into Mining and Milling Business Extensively.

H. D. Quimby, the local representative of the Lanyon Zinc company, has just returned from a trip to the companys' zinc mine at Ketchum, Ida. He states that the first class ore of the mine is being shipped to Iola and that the second class is being piled up preparatory to its shipment to his compelose. pany's zinc ore separating mill in this city, designated as the plant of the Western Ore Separating company.

Mr. Quimby says that the plant here was not built for the express purpose of treating middlings from outside mills, and that it is not at all dependent upon them for material with which to keep it in operation. The plant is intended for the treatment of zinc middlings which will eventually be shipped from properties owned and controlled by the Lanyon company and located in Utah, Idaho, Montana and Navada. The Lanyon company will Nevada. The Lanyon company will, however, continue to purchase at high-est market prices, all the zinc ore of-

says, now has under consideration the manner in which everything was being

With the purpose of investigating the north and northwest country with a view to the establishment of wet mills. J. M. McClave, the company metallurgical and mechanical engineer, pulled out last night to be gone possibly several weeks.

Campbell stated yesterday that the property was still running and that it was not expected that any bother from a coal shortage would be experienced.

LOWER MAMMOTH SHIPPING.

First Fifty Tons of Ore From 1,500 Level Are Ordered Loaded.

The first car of ore from the 1,500-foot level of the Lower Manmoth is now being loaded and lifty tons of the rock will be on the market during the next two or three days. While the ore is not going to prove of very high grade. Manager John Dern, who mentioned the fact that the shipment had been ordered, stated that he had consulted with the smeltermen and was convinced that a profit of \$5 to 7 per ton could be realized. "A great deal of this characte: of

"A great deal of this characte: of ore," said Mr. Dern, "is available and it profit of \$250 to \$300 a car might just as well be realized from it as to take ore out of the mine and pile it up on the dump. Every foot that has been driven in the ledge since it was opered has shown an improvement in the quality of the ore and, while I have heard nothing from the mine today. I feel certain that the limit in Talue has not yet been reached; in fact, the chances for such improvement yet are excellent."

chances for such improvement yet are excellent."

The drift which is being run in the vein is all in ore and, while the width of the ledge on the 1,500 has not been determined, it is probably twenty feet or more, so that a large tonnage is assured if the management deems it advisable to take it out during the time that new ground is being opened.

Mining Notes. Samuel Newhouse left for Denver and the east Friday noot. The date of his return is indefinite.
